

JUNAID SHAIK

AI Solutions Lead | Solutions & Enterprise Architect | Generative AI

Limerick, Ireland | +353 85 887 3672 | saajunaid@gmail.com

Portfolio: jun-ai-d.vercel.app | LinkedIn: in/junaid-shaik | GitHub: github.com/saajunaid

PROFESSIONAL SUMMARY

Solutions and AI Architect with 15+ years in telecom and technology, now leading enterprise Generative AI. Ships production AI end to end, from LLM integration (cloud and on-prem) and RAG to agentic systems (MCP, multi-agent pipelines), on a foundation of deep BSS/OSS, network and silicon-level hardware experience. Core member of an AI Centre of Excellence, architect of a €200M fibre transformation serving 1M+ customers, and creator of three published AI developer tools. TOGAF 9 certified and AWS AI Practitioner; turns strategy into scalable, secure, business-impacting platforms.

AI & GENAI ENGINEERING

- **LLM Integration (deployed):** Azure OpenAI (GPT-4o, Whisper, text-embedding-3-small) and on-prem open-source models via Ollama and vLLM (Qwen, GLM) across contact-centre applications.
- **Retrieval-Augmented Generation:** Architected a RAG customer assistant using FAISS (migrated from ChromaDB) with Azure OpenAI embeddings and gpt-4o, hybrid proxy routing, graceful keyword fallback and source-cited answers.
- **Agentic AI & MCP:** Built and published agentic developer tools (VS Code extensions and a Claude Code plugin) with MCP tools, multi-agent pipelines and deterministic routing.
- **Platform & Hardware:** Designed UCIP, a provider-routing LLM orchestration layer with on-prem GPU (A100/H100) serving via vLLM, GKE plus Apigee, and OAuth2/OIDC. First-hand silicon background (ARM/ATOM CPUs, Broadcom/PUMA SoCs) underpins this hardware-up approach to GPU compute.

SELECTED AI PROJECTS

UCIP: Unified Customer Intelligence Platform (*Architect*). API-first platform unifying three production apps into one customer-keyed intelligence layer for 1M+ customers; designed provider-routing LLM orchestration, an MCP tool surface, on-prem GPU (vLLM) inference and a GKE plus Apigee migration with OAuth2/OIDC.

Customer 360 / ServeSight (*Architect & Builder*). 360-degree contact-centre intelligence over Pega, ServiceNow, Qfiniti and Cisco data. Architected the VIBO RAG assistant (FAISS plus gpt-4o) with a resilient proxy, keyword fallback and source citations. FastAPI and React, with cross-database identity resolution.

AI Agent Assist (*Lead*). Real-time contact-centre assistant using Azure OpenAI Whisper and GPT-4 on GCP for live agent suggestions and automated after-call work.

Appointment Assist (*Architect & Builder*). AI field-dispatch engine recommending DISPATCH, CANCEL or REVIEW from network diagnostics, running an on-prem Qwen-32B model via vLLM. FastAPI and React with Redis/RQ.

RevSight: Mobile Revenue Assurance (*Architect & Builder, in build*). Mobile CDR revenue-leakage detection across 100+ countries. Typed analytical marts over 4.3M+ records per month scaling to 90M+ rows, with daily validation controls.

PUBLISHED AI DEVELOPER TOOLS

junai *VS Code, junai-labs.junai*. Agentic pipeline for GitHub Copilot with 26 specialist agents, 9 MCP tools and deterministic stage routing.

ptarmigan *VS Code, junai-labs.ptarmigan*. TDD-enforced, gate-guarded agentic delivery system that turns Copilot into a disciplined intent-to-ship pipeline.

claudster *Claude Code plugin*. 5-stage development harness with 12 read-only agents and 130+ skills, model-portable via a LiteLLM gateway to local LLMs (vLLM, Ollama).

PROFESSIONAL EXPERIENCE

Core Member, AI Centre of Excellence (CoE)

2025 to Present

Virgin Media Ireland

Limerick, Ireland

- Core member of VMIE's AI Centre of Excellence since its inception, shaping enterprise AI strategy, governance and value-creation frameworks across business units.
- Lead the design and delivery of production GenAI platforms: contact-centre AI assistants, RAG-based customer intelligence and AI-driven field dispatch.
- Define enterprise standards for LLM integration, RAG, agentic (MCP) systems and hybrid cloud or on-prem model serving.

Lead Solutions Architect, Architecture & Transformation

Sep 2019 to Present

Virgin Media Ireland

Limerick, Ireland

- Architected end-to-end provisioning for the €200M fibre programme (HFC to XGS-PON) on GCP, from orchestration to cloud-based service activation.

- Led the design and implementation of Nokia AAA RADIUS and Altiplano Access Controller across NetCo and ServCo networks.
- Drove Contact Centre Transformation, replacing legacy Cisco IVR and Pega chat with a Genesys CCaaS omnichannel ecosystem; modernised operations with UiPath RPA and AI.
- Introduced SAFE ways of working, mentored architects and developers, and managed delivery across SIT, UAT, ORT and Production.

Senior Network Architect

Liberty Global

Sep 2018 to Jul 2019
Netherlands / Ireland / UK

- Led B2B CPE architecture (DOCSIS 3.0/3.1) across the UK and Pan-EU, working hands-on with Intel ATOM-based platforms and silicon SDKs.
- Discovered and resolved a critical bug, a security vulnerability in the Intel SDK, during DOCSIS 3.1 CPE manufacturing, saving several million euros and designing a strategic mitigation to future-proof operations.
- Negotiated vendor terms (Intel, Hitron), reviewed Statements of Work, and presented strategic plans to Directors and VPs.

Connectivity Service Test Engineer

Liberty Global

Jan 2017 to Sep 2018
Dublin, Ireland

- Built CPE certification automation frameworks and represented Liberty Global in the RDK-B and TDK-B standards forum; ran a centralised modem farm for remote diagnostics.

DOCSIS CPE Test & Certification Engineer

Virgin Media Ireland

Jul 2013 to Jan 2017
Dublin, Ireland

- Led the Mv1 cable modem launch in Ireland and provided expert 3rd-tier support, troubleshooting ARM/ATOM processors, Broadcom/PUMA chipsets and WiFi through log analysis and root-cause investigation.
- Managed CPE projects with the PMO, led UAT with OSS/BSS teams, and mentored and trained internal teams.

Technical Support Engineer

Virgin Media Ireland

Feb 2008 to Jul 2013
Limerick, Ireland

- Grew the Technical Support Desk over five years as an SME, with fault-trend analysis for broadband, VoIP and SIP, NOC monitoring, and team leadership and mentoring.

EDUCATION

MBA, Business Administration, Heriot-Watt University

2008 to 2011

B.Tech, Computer Science & Information Technology, Jawaharlal Nehru Technological University

2003 to 2007

CERTIFICATIONS

AWS Certified AI Practitioner (2025) | Develop AI-Powered Prototypes, Google AI Studio (2025) | Northstar: Snowflake Intelligence (2025) | TOGAF 9 Certified (2021) | Postman API Fundamentals Student Expert (2023) | Certified Tester Foundation Level, CTFL (2018)

TECHNICAL SKILLS

Generative AI: LLM integration, RAG, prompt engineering, MCP, multi-agent pipelines, LLM orchestration design

Models & Serving: Azure OpenAI (GPT-4o, Whisper, text-embedding-3-small), Ollama, vLLM; Qwen, GLM; Google AI Studio

AI Tooling & Cloud: FAISS, ChromaDB, LiteLLM gateway, in-app observability; GCP (GKE, Apigee), AWS, Snowflake, Docker, Kubernetes, Redis, CI/CD

Engineering: Python, FastAPI, SQLAlchemy, React, TypeScript, SQL Server, REST, TM Forum Open API

Architecture & Hardware: TOGAF, enterprise and solution architecture, microservices, BSS/OSS, XGS-PON, DOCSIS; ARM/ATOM and Broadcom/PUMA silicon, on-prem GPU (A100/H100)

BSS/OSS & Platforms: Cerillion, Clarify, Ciena BluePlanet, PEGA, Zira, Nokia AAA, Altiplano, Salesforce, ServiceNow, Genesys

AWARDS

Star Techie Award and Unsung Hero Award (Virgin Media Ireland), for exceptional technical contribution and consistent outstanding delivery.
